

PROSECUTION VS MEDCORP

- Medical company (Medcorp), based in Petronasia, and provides 70% of epilepsy meds, 25% of painkillers used in hospitals and 50% hospital x-ray machines INTERNATIONALLY
- Currently, it is the 4th largest med company in the world,
- Employs 15 of Petronasia's population
- This year, information was found by reporter Alfredo Linguine working for the BNC, the national news network of Engerterra, the neighboring country to Petronasia saying that
- 5 years ago, when the company was founded and medcorp started doing human trials to test their new products
- They paid lots of money and guaranteed safety and security for their families
- The first prototypes of the companies epilepsy medication was toxic in the first trials
- 200 out of the 350 participants died within the next year
- Others had minor health problems
- The reporter said all this information was leaked by an ex employee of Medcorp, Lillian Gonzalez
- She declined to give any comment except for the fact that Linguine leaked her name without her consent
- This story went viral, and the products of the company were boycotted in some countries, leading to a huge decrease of sales for the company and the salaries of 15.000 employees couldn't be paid
- The investigation has been going on for 2 months so far, and Medcorp has been prohibited from producing their painkillers and other meds, leading to both a further increase of the companies economic downfall and hospitals are PROSECUTION VS MEDCORP 2 unable to treat epileptic patients because of the shortage of meds from Medcorp.
- The leaders of Medcorp have changed since the alleged human trials, and claim that they had no idea about the trials.
